

Classroom 8 Happenings – September 2008

Written by Will Schein, Thomas Ueland, and Drew Howard

This year for Science we have been studying Weather. Lots of people have made barometers and can almost predict the weather. In History, we are studying three different subjects. They are Music History, Civics, and US Presidents. For Geography, Australia is our main topic since Ms. Hunter just came back from there. We now know all of the capitals and territories in Australia.

Language is usually taught by Mrs. Franklin. We are starting out learning analogies, use of commas, quotations, and homophones.

She is a very good teacher and it is fun learning. Ms. Hunter usually teaches math and she is very good at it. We are studying multiplication facts, fractions, and some are even learning algebra!!

Upcoming events include Yogi Doraine Bailey who will teach a yoga class on Sept. 22nd. Ms. Hunter, who is a very good reader, has just finished reading "The Giver" and we will attend the play at LCT on Sept. 30th. Everyone is looking forward to our annual trip to Pine Mountain Settlement School which will be Oct.21-22. We always have a good time exploring nature, weaving, square dancing(Mrs.Franklin's favorite), and climbing the mountain.

If you smell something delicious, it is coming from the Life Lab. Every Friday two students from our classroom cook an entree and dessert. YUM! YUM!
