

Six Grade Math

By Emmet Allen

In Sixth grade, we are learning to do pre-algebra. We all seem to be enjoying it and it is not very hard when you know what to do. I particularly enjoy finding and assigning the value to variables.

4-Works

By Cooper Collins

In our classroom, we do something called the four works. There is Daily Language (DL), where you have to correct sentences. There is Mystery Word (MW), where you have to look up a word in the dictionary. There is Daily Geography (DG), where you have to answer a geography question. We are answering questions about the United States right now. The last daily work is called Daily Math (DM). It is divided into grades because we all don't have the same Math. The 4-Works take us a long time in the 4th grade but over the years you get really fast at it.

Manchester Center Party

By Laiken Ross

On October 31st, Classroom 8 invited the Manchester Center kids over to have a Halloween Party. The Manchester kids are 3-4 years old. We decorated the classroom with streamers and pumpkins. The students brought different items like, candy, cake, drink, and small toys. We went outside to our play ground to get some fresh air and play in the sand box. We also played inside games and did projects like making ghost out of lollipops, the Pumpkin Toss, coloring witches, and Halloween dress-up. Some kids enjoyed all the games, but some kids decided to wander around. After the fun filled day, the Manchester kids went back to the center, while Classroom 8 gorged on candy. During Valentine's Day Classroom 7 will have the Manchester Center children over for a lovable Valentine Party.

Pine Mountain

By Lucy Macfarlan

In Late October, Classroom 8 drove to Bledsoe, Kentucky to visit Pine Mountain Settlement School. When we got there we ate lunch and then took two classes. They were weaving on a loom and streams where we got to look for pennies and crawdads. We also had fun square dancing, playing games, and listening to Ms. Hunter read, Brain's Song, a sequel to Hatchet. The next morning the fourth grade went on a Native American walk, while the fifth and sixth grade went on the traditional Summit Hike. This is a 4 mile hike. It was long but fun. We were all sad to leave and we can't wait until next year.

Music

By Lucy Macfarlan

On December 17th, Classrooms 7 and 8 will be performing several holiday songs from different cultures. Mrs. Franzini, our music teacher, is very excited about the performance and has had us practicing for the last few months. We hope you can come to our concert because we think you will enjoy it.

Titanic

By Laiken Ross

On January 19, 2010, we will be visiting the Louisville Science Center to see an exhibit and movie about the Titanic. The exhibit is showing true objects that they pulled out of the actual Titanic even though it is deep in the North Atlantic Ocean. Later we will see the IMAX movie called, The Titanic, which is about how they pulled up all the objects. We will have lunch at a place called The Cafe and then return back to school. We are excited about this trip.

History

By Tom Hafley

We have been studying WWI in class. It has been fun and the class will be sad to see it end. Some of the works include: Arch Duke Ferdinand assassination, country alliances, poison gas and tanks which were first used in WWI, the 14 Points and the League of Nations, the sinking of Lusitania, Zeppelins, and the causes and effects of the war. It has been fun, but horrific, to study this period of history. It has been the most interesting unit yet. We will all remember this unit.
