A ful World Will In- clude...

No war. War is wrong. We should solve our problems with words not guns.

Love. We need to love. Stop hating. Kindness. Kindness and love are very similar.

No accusation. Accusing people for something you don't know they did wrong.

No murdering. Murdering is rude, inconsiderate, and hurtful.

No littering. Littering hurts not only the environment but animals as well.

Saving water. Saving water is important because there no where near as much freshwater as there is salt-water.

Plant seeds. Planting seeds brings new life to the world.

Stop killing animals. We need to stop killing animals. Soon we will kill all the animals in the world and there will be none left.

Recycle. We need to recycle because if we don't the landfills will fill up and garbage will take over. Also we need to recycle because paper is made of trees and if we don't recycle paper people will have to keep going and chopping down trees and trees give us oxygen.
